

simpleSOX™

Adjustable Fabric Air Dispersion System

A SimpleSox™ System is an adjustable fabric air dispersion system assembled with pre-made components readily available. The versatility of a SimpleSox™ System is unmatched as you can easily adjust both the volume and direction of air, as well as the location of where air will be dispersed, both during and after installation.

A SimpleSox™ System consists of up to eight standard parts available in five diameters (12", 16", 20", 24", and 28") to deliver up to 6000 CFM per run. Each system has standard and optional components to meet your airflow and layout needs. SimpleSox™ Systems are configurable up to 14 airflow volumes and a total of 63 combinations considering orifice size, orientation, and the number of orifices activated.

SimpleSox™ Systems are intended for simple, open ceiling applications using straight runs with or without 90 degree elbows. They can be used as an alternative for uninsulated metal duct and diffuser systems in traditional heating and ventilating applications, including some conditioned environments. Typical applications are light industrial and retail, but can include many others.

Fabric

SimpleSox™ Systems are constructed using a medium weight, commercial grade non-permeable white fabric that is machine washable.

Specifications

- Weave: Fire Retardant Polyester
Plain Weave, Coated
- Weight: 5.5 oz/yd²
- Porosity: None
- Codes: Classified by Underwriter's Laboratories in accordance with the requirements of:
- NFPA 90A
 - ICC/AC167; "Acceptance Criteria of Fabric Air Dispersion Products"
 - UL 2518
